

# GET A SESSION

## Overview

Retrieves the signed in players current **session object**. This returns useful information about the current player that you may want to display in your game.

## Request URL

All parameters in the request must be sent as a `post` HTTP request. Make all requests to the following URL:

```
1 | https://auth.construct.net/getsession.json
```

## Authenticating The Request

This end point is for **signed in** players only.

**sessionKey** `string` **Required**

The **session key** of the player you're making the request against.

## Request Parameters

**gameID** `guid` **Required**

The ID of the game you are making this request against. You can find the ID of your game in your **Construct Game Services (CGS) account**.

## Success Response

Successful responses always return a `HTTP 200` status code.

```
1 {  
2   "success": true,  
3   "session": { ... },  
4   "formattingCulture": "en-us"  
5 }
```

## Response Properties

---

**success** `bool`

If the request was successfull or not.

---

**session** `Session`

The session returned from the request.

---

**formattingCulture** `string`

If some return values are `culture specific`, this property indicates what culture the values have been rendered as.

## Failure Response

Unsuccessful responses always return `HTTP 4xx` status codes.

```
1 {  
2   "success": false,  
3   "errorMessage": "Your request failed due to...",  
4   "helpURL": "https://www.construct.net/en/game-services/manuals/  
5   "shouldRetry": false  
6 }
```

## Response Properties

---

**success** `bool`

If the request was successfull or not.

---

**errorMessage** `string`

An error message with more detailed information on why the request failed.

**helpURL** url (string)

A link to documentation which should provide help with the error.

---

**shouldRetry** bool

Should the client wait a short period of time and retry the request. Usually this is false, but returns true if the request failed due to rate limiting.
