

GET A TEAM

Overview

Retrieve a single existing **team**.

Request URL

All parameters in the request must be sent as a `POST` HTTP request. Make all requests to the following URL:

```
1 | https://leaderboards.construct.net/getteam.json
```

Authenticating The Request

No authentication is required for calling this end point.

secret `string` **Optional**

Your games **secret API key**.

Request Parameters

gameID `guid` **Required**

The ID of the game you are making this request against. You can find the ID of your game in your **Construct Game Services (CGS) account**.

leaderboardID `guid` **Required**

The ID of the leaderboard you're fetching a team from.

teamID guid **Required**

The ID of the team you're fetching.

culture string **Optional**

Optionally specify a **supported culture code** for rendering various properties. If not specified, the culture code from your games default language will be used.

Success Response

Successful responses always return a `HTTP 200` status code.

```
1 {  
2   "success": true,  
3   "team": { ... },  
4   "formattingCulture": "en-us"  
5 }
```

Response Properties

success bool

If the request was successful or not.

team ExpandedTeam

The team object returned in the request.

formattingCulture string

If some return values are **culture specific**, this property indicates what culture the values have been rendered as.

Failure Response

Unsuccessful responses always return `HTTP 4xx` status codes.

```
1 {  
2   "success": false,  
3   "errorMessage": "Your request failed due to...",  
4   "helpURL": "https://www.construct.net/en/game-services/manuals/  
5   "shouldRetry": false  
6 }
```

Response Properties

success bool

If the request was successful or not.

errorMessage string

An error message with more detailed information on why the request failed.

helpURL url (string)

A link to documentation which should provide help with the error.

shouldRetry bool

Should the client wait a short period of time and retry the request. Usually this is false, but returns true if the request failed due to rate limiting.
