

THE MAIN TOOLBAR

The main toolbar provides quick access to a few of the most commonly-used options in Construct. It appears next to the [main menu button](#).

The main toolbar has the following buttons:

- **Save:** save the current project to its last saved location. If the project has not been saved yet, this defaults to Cloud Save. For more information see [Saving & sharing projects](#).
- **Undo and Redo:** undo the last performed action in the editor. After pressing undo, you can then redo the action again. Click the dropdown arrow next to the button to see a list of the undo or redo actions. Selecting an item from the list will undo or redo all the actions up to the chosen item.
- **Preview:** run a preview of the current layout. By default this opens a popup window; you may be prompted to allow popups. Click the dropdown arrow next to the button to see a list of other kinds of preview. For more information see [Testing projects](#). The dropdown arrow menu also allows changing the function of the button to one of the other options, such as *Debug layout*.
