

EVENT GROUPS

Groups of events are mainly for organising events. They can be collapsed and expanded using the arrow button in the title. They are edited with the [Event Group dialog](#). To add an event group, right click an event or empty space in the event sheet and select **Add group** or press the **G** keyboard shortcut.

Events can be **dragged and dropped** in to and out of groups (be sure to drag from the event margin, and not from a condition or action). Entire groups can also be enabled or disabled with the *Set Group Active* system action, which is useful for situations like pausing the game. Disabling unnecessary groups can also help [improve performance](#).

Customising colors

You can customise the event group header's colors by **right-clicking** and selecting **Colors ▶ Change text color** or **Colors ▶ Change background color**. To reset back to the default colors (which are based on the current theme), select **Colors ▶ Restore default colors**.
