

# TIMELINE TRACK

In the **Timeline Bar**, a track is represented as a row with an icon of the corresponding **instance**.

Tracks can be moved to and from **track folders** or the root of the **timeline** by dragging and dropping. A timeline can have many different tracks in its hierarchy, one for each instance added to it.

## Adding Tracks

To add a track to a timeline follow any of these methods:

- Use the  button in the Timeline Bar toolbar to bring up a dialog from which to choose instances to add to the timeline.
- Drag & drop instances from the **Layout View** into the bar.
- Right-click some instances in the Layout View and select **Timeline ▶ Add to timeline**.
- Right-click some Timeline Bar empty space and select **Track ▶ Add instances**.

## Track Properties

### Name

The name of the track. This can not be changed and is automatically generated from the object name and the instance UID.

### Animation mode

### Result mode

### Ease

### Path mode

See the section on common timeline element properties in [Timelines](#). These properties follow an inheritance pattern.

---

### **Visible**

### **Enabled**

### **Locked**

### **Show UI Elements**

See the section on common timeline element properties in [Timelines](#). Changing these at the track level will apply the change to every sub-element.

---

### **Track ID**

An optional identifier to be used in tandem with the **Set Instance** action. See the [Timeline plugin](#) section of the manual for more details.
