

ASSIGN A PLAYER TO A TEAM

View online: <https://www.construct.net/en/game-services/manuals/game-services/leaderboards/api-end-points/teams/assign-player>

Overview

Assign a player to a team.

Request URL

All parameters in the request must be sent as a `POST` HTTP request. Make all requests to the following URL:

```
https://leaderboards.construct.net/assignplayertoteam.json
```

Authenticating The Request

This end point is for `secret key` authenticated requests only. Signed in players cannot call this end point.

secret string Required

Your games `secret API key`.

Request Parameters

gameID `guid` Required

The ID of the game you are making this request against. You can find the ID of your game in your [Construct Game Services \(CGS\) account](#).

leaderboardID `guid` Required

The ID of the leaderboard the team exists on.

teamID `guid` Required

The ID of the team you're adding a player to.

playerID `guid` Required

The ID of the player you're adding to the team.

Success Response

Successful responses always return a `HTTP 200` status code.

```
{
  "success": true,
  "formattingCulture": "en-us"
}
```

Response Properties

success `bool`

If the request was successful or not.

formattingCulture `string`

If some return values are `culture specific`, this property indicates what culture the values have been rendered as.

Failure Response

Unsuccessful responses always return `HTTP 4xx` status codes.

```
{
  "success": false,
  "errorMessage": "Your request failed due to...",
  "helpURL": "https://www.construct.net/en/game-services/manuals/game-services/leaderboards/api",
  "shouldRetry": false
}
```

Response Properties

success `bool`

If the request was successful or not.

errorMessage `string`

An error message with more detailed information on why the request failed.

helpURL `url (string)`

A link to documentation which should provide help with the error.

shouldRetry `bool`

Should the client wait a short period of time and retry the request. Usually this is false, but returns true if the request failed due to rate limiting.
