

EVENT GROUPS

View online: <https://www.construct.net/en/make-games/manuals/construct-3/project-primitives/events/groups>

Groups of events are mainly for organising events. They can be collapsed and expanded using the arrow button in the title. They are edited with the **Event Group dialog**. To add an event group, right click an event or empty space in the event sheet and select Add group or press the **G** keyboard shortcut.

Events can be **dragged and dropped** in to and out of groups (be sure to drag from the event margin, and not from a condition or action). Entire groups can also be enabled or disabled with the *Set Group Active* system action, which is useful for situations like pausing the game. Disabling unnecessary groups can also help **improve performance**.

Customising colors

You can customise the event group header's colors by **right-clicking** and selecting Colors►Change text color or Colors►Change background color. To reset back to the default colors (which are based on the current theme), select Colors►Restore default colors.
