The `IEventSheet` interface represents an event sheet in the project model.

> *Since events can be nested underneath each other, they are represented as a tree.* `GetRoot()` *returns the root node of the tree.*

Methods

GetProject()

Return the associated IProject.

GetName()

Return the name of the event sheet.

GetRoot()

Return the root node of the event sheet. This is an IEventParentRow representing the top level of the event sheet.
