BILLBOARD BEHAVIOR SCRIPT INTERFACE

View online: https://www.construct.net/en/make-games/manuals/construct-3/scripting/scripting-reference/behavior-interfaces/billboard

The `IBillboardBehaviorInstance` interface derives from IBehaviorInstance to add APIs specific to the Billboard behavior.

Billboard behavior APIs

offsetX

offsetY

offsetZ

Set or get the additional 3D rotation in radians to apply around the X, Y and Z axes after orienting the object directly towards the camera.

isEnabled

A boolean indicating if the behavior is enabled. If disabled, the behavior no longer has any effect on the object.
