ITEXTURE SCRIPT INTERFACE

View online: https://www.construct.net/en/make-games/manuals/construct-3/scripting/scripting-reference/graphics-interfaces/itexture

---

The `ITexture` interface represents a texture for use with the renderer.

This interface cannot be directly constructed. It is only available through other APIs.

ITexture APIs

---

width

height

Return the width or height of the texture. Note this refers to the source texture. Construct's in-editor spritesheeting engine means the texture could be significantly larger than an object's image to be rendered from it.

---

defaultSampling

Return the default sampling mode this texture was created with.
