AABB3D SCRIPT INTERFACE

View online: https://www.construct.net/en/make-games/manuals/construct-3/scripting/scripting-reference/interfaces/iaabb3d

---

The `IAABB3D` interface represents an **axis-aligned bounding box** in 3D. It contains a minimum and maximum extent on the X, Y and Z axes. It is returned by the IWorldInstance method `getBoundingBox3d()`.

AABB3D APIs

---

constructor(left, top, back, right, bottom, front)

Create a new IAABB3D with the specified properties. Any parameters may be omitted in which case they will default to 0.

---

left

top

back

The minimum extent on the X, Y and Z axes respectively.

---

right

bottom

front

The maximum extent on the X, Y and Z axes respectively.

---

clone()

Return a new IAABB3D which is a copy of this one.

---

copy(other)

Set this object's properties according to another IAABB3D.

---

set(left, top, back, right, bottom, front)

Set all the properties with one call.
